Subject Index

ABH incompatible bone marrow transplantation: removal of erythrocytes by starch sedimentation (DINSMORE, REICH, KAPOOR, GULATI, KIRKPATRICK, FLOMENBERG & O'REILLY), 441.
Alpha-methyldopa induced red cell autoantibodies, disappearance of, despite continuation of the drug (HABIBI), 493.
Anaemia, aplastic, improved survival following bone marrow transplantation for (FEIG, CHAMPLIN, ARENSON, YALE, HO, TESLER & GALE), 509.

Anaemia, aplastic, serum, haemopoietic stimulators and inhibitors in (NISSEN, MOSER, SPECK & BENDY), 519.

Anaemia, macrocytic, an underdiagnosed form of: the 5q− syndrome (TINEGATE, GAUNT & HAMILTON), 103.

Anaemia, methotrexate-induced immune haemolytic (WOOLLEY, SACHER, PRIEGO, SCHANFIELD & BONNEM), 543.

Anaemia of myelofibrosis: its value in prognosis (NJOKU, LEWIS, CATOVSKY & GORDON-SMITH), 79.

Anaemia of premature infants, serum erythropoietin titres in (SAITO, URABE, URAMOTO, HASHIMOTO & TAKAKU), 53.

Anaemia, sickle cell, evidence against enhanced platelet activity in (BUCHANAN & HOLTKAMP), 595.

Anaemias, congenital dyserythropoietic and congenital sideroblastic, iron loading in (CAZZOLA, BAROSI, BERGAMASCHI, DEZZA, PALESTRA, POLINO, RAMELLA, SPRIANO & ASCARI), 649.

Aplasia, pure red cell (SIEFF), 331.

Antithrombin III assays, comparison of: methods of choice (BICK), 323.

Antithrombin III, hereditary dysfunctional, a new variant of (AT III 'Vicenza'), immunoelectrophoretic evidence of a thrombin-induced abnormality in (BARBUI, FINAZZI, RODEGHIERO & DINI), 561.

Basophil differentiation in Ph-positive blast cell leukaemia (LAWLOR, MCCANN, WILLOUGHBY, DUNNE & TEMPERLEY), 157.

B cell malignancies, normal equivalent cells of: analysis with monoclonal antibodies (GOBBI, CALIGARIS-CAPPIO & JANOSSY), 393.

BFU-E and CFC-GM, improved culture of, by the use of an oil seal (POTTER & CAPPELLINI), 153.

Blood group A antigen site distribution and immunoglobulin binding in relation to red cell age (SMALLEY & TUCKER), 209.

Book reviews

Activated Prothrombin Complex Concentrates, Managing Hemophilia with Factor VIII Inhibitor, 327.

Blood and its Disorders, 497

Blood Biochemistry, 326.

Bone Marrow Biopsies Revisited. A New Dimension for Hematologic Malignancies, 661.

Chemotaxis and Inflammation, 662.

Current Hematology, 502.

Manual of Hemostasis and Thrombosis, 500.

Monoclonal Antibodies in Clinical Medicine, 325.

Platelets: Pathophysiology and Antiplatelet Drug Therapy, 497.

Recent Results in Cancer Research. Cytotoxic Drugs and the Granulopoietic System (Review), 162.

Red Cell Membranes. A Methodological Approach, 501.

Rh Hemolytic Disease. New Strategy for Eradication, 326.

The Biochemistry and Physiology of Iron, 661.

CFC-GM and BFU-E, improved culture of, by the use of an oil seal (POTTER & CAPPELLINI), 153.

Chemo-radiotherapy, high dose and supralethal, using stored, non-cryopreserved autologous bone marrow, haematological reconstitution following (BURNETT, TANSEY, HILLS, ALCORN, SHEEHAN, MCDONALD & BANHAM), 309.

Cobalamin analogues in human sera binding to intrinsic factor and to R-type vitamin B_{12} binders, separation of (MUIR & CHANARIN), 613.

Colchicine ultrasensitivity of lymphocytes in chronic lymphocytic leukaemia (WETHERLEY-MEIN, THOMSON, O'CONNOR, PEEL & SINGH), 111.

Colony stimulating activity, production by monocyte enriched fractions from murine continuous bone marrow culture adherent layers (OBLON, CASTRO-MALASPINA & BROXMEYER), 291.

Complement C3, platelet-associated, in thrombocytopenic states (KAYSER, MUELLER-ECKHARDT, BHAKDI & EBERT), 353.

Cyclosporin A associated nephrotoxicity in the first 100 days after allogeneic bone marrow transplantation: three distinct syndromes (ATKINSON, BIGGS, HAYES, RALSTON, DODDS, CONCANNON & NAIDOO), 59.

Cyclosporin A, nephrotoxicity in bone marrow transplant recipients treated with (HOWS, CHIPPING, FAIRHEAD, SMITH, BAUGHAN & GORDON-SMITH), 69, 663.

Density of human platelets, measurement of, and its relationship to volume (MARTIN, SHAW, HEGGIE & PENINGTON), 337.

Disulfide bonds are a requirement for Kell and Cartwright (Yt^a) blood group antigen integrity (BRANCH, MUENSCH, SY SIOK HIAN & PETZ), 573.

Elliptocytosis, transfusion dependent homozygous hereditary, defective spectrin dimer-dimer association in a family with (EVANS, BAINES, HANN, AL-HAKIM, KNOWLES & HOFFBRAND), 163.

Erythrocyte membrane skeleton abnormalities in hereditary spherocytosis (BURKE & SHOTTON), 173.

Erythroleukaemic cells, murine, iron metabolism in (PETO, RUTHERFORD, THOMPSON & WEATHERALL), 623.

Factor VIII inhibitor and raised platelet IgG levels associated with methyldopa therapy (DEVEREUX, FISHER, ROTER & HEGDE), 485.

Factor XII, effect of DDAVP on plasma level of (NENCI, BERRETTINI, DE CUNTO & AGNELLI), 489.

Fanconi anaemia, radiosensitivity in: application to the conditioning regimen for bone marrow transplantation (GLUCKMAN, DEVERGIE & DUTREIX), 431.

Fibrinogen Manchester: identification of an abnormal fibrinopeptide A with a C-terminal arginine→histidine substitution (SOUTHAN, KEHL, HENSCHEN & LANE), 143.

Folate deficiency, cellular abnormalities of (STEINBERG, FONDA, CAMPBELL & HILLMAN), 605.

G-6-PD deficiency, abnormal haemoglobin and G-6-PD deficiency in Libya (JAIN), 154.

Granulocyte to macrophage predominance, transition from, in bone marrow cultures (SHULMAN & ROBINSON), 405.

Haemoglobin, abnormal, thalassaemia and G-6-PD deficiency in Libya (JAIN), 154.
Haemoglobin H (HbH) disease and severe glutathione peroxidase deficiency: an undescribed association in a mentally retarded child (VIVES CORRONS, AGUILAR & MATEO), 160.
Haemoglobin M Milwaukee mutation at the DNA level, analysis of (HORST, SCHÄFER, KLEIHAUSER & KOHNE), 643.
Hypercalcaemia complicating acute myelogenous leukaemia: a syndrome of multiple aetiologies (GEWIRTZ, STEWART, VIGNERY & HOFFMAN), 133.
Hypercalcaemia in multiple myeloma, the use of dichloromethylene diphosphonate for the management of (PATERSON, KANIS, CAMERON, DOUGLAS, BEARD, PRESTON & RUSSELL), 121.

Idiopathic thrombocytopenic purpura, childhood, management of (LILLEYMAN), 11.
Immunoglobulin binding and blood group A antigen site distribution in relation to red cell age (SMALLEY & TUCKER), 209.
Interferon production by human marrow stromal cells (SHAH, DEXTER & LANOTTE), 365.
Iron chelation therapy, the management of (PIPPARD & CALLENDER), 503.

Lactoferrin, receptor binding of, by human monocytes (BIRGENS, HANSEN, KARLE & KRISTENSEN), 383.
Leukaemia, acute myelogenous, hypercalcaemia complicating: a syndrome of multiple aetiologies (GEWIRTZ, STEWART, VIGNERY & HOFFMAN), 133.
Leukaemia, acute myeloid, quantitative cytochemistry of blood neutrophils in (SCHOFIELD, STONE & STUART), 261.
Leukaemia, adult acute non-lymphocytic, relationship between bone marrow karyotype and outcome of remission induction therapy in (BERNARD, LACOMBE, REIFFERS, BOISSEAU & BROUSTET), 657.
Leukaemia, B-chronic lymphocytic, T-cell functional abnormality in: evidence of a defect of the T-helper subset (LAURIA, FOA, MANTOVANI, FIERRO, CATOVSKY & TURA), 277.
Leukaemia cells, acute non-lymphocytic, rates of cholesterol biosynthesis are related to early differentiation in (YACHNIN, LARSON & WEST), 459.
Leukaemia, chronic lymphocytic, colchicine ultrasensitivity of lymphocytes in (WETHERLEY-MEIN, THOMSON, O'CONNOR, PEEL & SINGH), 111.
Leukaemia, juvenile chronic myelogenous, characterization of the erythropoietic precursors (BFU-E), in a patient with, by the analysis of $^{G}\gamma$ and $^{A}\gamma$ globin chains (TERASAWA, ITO, MATSUDA, SUZUKI & KASAI), 269.
Leukaemia, non-myeloid, Sudan black positivity in (SAVAGE & HOFFMAN), 494.
Leukaemia, Ph-positive blast cell, basophil differentiation in (LAWLOR, MCCANN, WILLOUGHBY, DUNNE & TEMPERLEY), 157.
Leukaemia, Ph^1-positive chronic, randomized trial of splenectomy in, including an analysis of prognostic features (M.R.C.'s WORKING PARTY FOR THERAPEUTIC TRIALS IN LEUKAEMIA), 415.
Leukaemia, Philadelphia chromosome-positive pre-B cell acute, in an adult woman: early lymphoid blast crisis of chronic myeloid leukaemia? (LUCIVERO, ANTONACI & BONOMO), 320.
Leukaemia, prolymphocytic, responsiveness to sepharose protein A from *Staphylococcus aureus* of lymphoid cells in a case of (SANSONI, TRIDENTE, VALENTE & BUTTURINI), 317.
Leukaemia, typical hairy-cell, paraproteinaemia plus osteolytic lesions in (JANSEN, BOLHUIS, VAN NIEUWKOOP, SCHUIT & KROESE), 531.
Leukaemias, T cell, comparison of purine degradative enzymes and terminal deoxynucleotidyl transferase in (MA, MASSAIA, SYLWESTROWICZ, PRICE & HOFFBRAND), 451.

Methaemoglobinaemia, analine-induced, studies of the efficacy and potential hazards of methylene blue therapy in (HARVEY & KEITT), 29.
Methylene blue therapy in analine-induced methaemoglobinaemia, studies of the efficacy and potential hazards of (HARVEY & KEITT), 29.
Myelodysplasia and plasma cell neoplasia, coexistent (MUFTI, HAMBLIN, CLEIN & RACE), 91.
Myelodysplastic syndromes, decreased T helper cells in (BYNOE, SCOTT, FORD & ROBERTS), 97.
Myelofibrosis, anaemia of: its value in prognosis (NJOKU, LEWIS, CATOVSKY & GORDON-SMITH), 79.
Myelofibrosis, primary and secondary, circulating granulocyte and macrophage progenitor cells in (WANG, CHEUNG, AHMED, STEIER & TOBIN), 301.
Myeloid lymph node infiltration preceding acute myeloid leukaemia in a case of myelodysplastic syndrome (NIELSEN, HANSEN & THIEDE), 321.
Myeloma, multiple, the use of dichloromethylene diphosphonate for the management of hypercalcaemia in (PATERSON, KANIS, CAMERON, DOUGLAS, BEARD, PRESTON & RUSSELL), 121.
Myeloproliferative disorders, circulating, pluripotent haemopoietic cells in patients with (DOUER, FABIAN & CLINE), 375.

Paraproteinaemia, benign, helper/suppressor T-cell subpopulations in (GONZALEZ, SAN MIGUEL, CABALLERO & LOPEZ-BORRASCA), 318.
Penicillin-G degradation products inhibit *in vitro* granulopoiesis (NEFTEL, MÜLLER, WÄLTI, ERNI, GUGLER & ARRENBRECHT), 255.
Philadelphia chromosome, hidden (LIU YIN, WALKER & KUMARAN), 155.
Plasmodium falciparum parasitaemia, quantitation of red cell membrane associated immunoglobulin in children with (JEJE, KELTON & BLAJCHMAN), 567.
Platelet adhesion to the subendothelium, role of von Willebrand factor in (MEYER & BAUMGARTNER), 1.

Prostacyclin (PGI_2), binding and inactivation of, by human erythrocytes (WILLEMS, STEL, VAN AKEN & VAN MOURIK), 43.
Prostacyclin (PGI_2), inactivation of by erythrocytes (JAKUBOWSKI, THOMPSON & DEYKIN), 658.
Protein, fast migrating, immunochemically related to human factor VIII, studied by crossed immunoelectrophoresis in agarose (THOMAS, HOWARD, SALEM & FIRKIN), 221.
Prothrombin Habana: a new dysfunctional molecule of human prothrombin associated with a true prothrombin deficiency (RUBIO, ALMAGRO, CRUZ & CORRAL), 553.
Prothrombin type 3, human, determination of the amino acid substitution in (157 Glu→Lys), and the localization of a third thrombin cleavage site (BOARD & SHAW), 245.
Pyruvate kinase deficiency, erythrocyte, inhibition of the pentose phosphate shunt by 2,3-diphosphoglycerate in (TOMODA, LACHANT, NOBLE & TANAKA), 475.
Pyruvate kinase isozymes, change from M_2- to L-type during development of the red cell (TAKEGAWA, FUJII & MIWA), 467.

5q− syndrome: an underdiagnosed form of macrocytic anaemia (TINEGATE, GAUNT & HAMILTON), 103.

Sickle cell disease, homozygous, a trial of folate supplementation in children with (RABB, GRANDISON, MASON, HAYES, SERJEANT & SERJEANT), 589.
Sickle cell disease: the proportion of liganded haemoglobin needed to prevent crises (FRANKLIN, ROSEMEYER & HUEHNS), 579.
Spectrin dimer–dimer association, defective, in a family with transfusion dependent homozygous hereditary elliptocytosis (EVANS, BAINES, HANN, AL-HAKIM, KNOWLES & HOFFBRAND), 163.
Spectrin–haemoglobin crosslinkages associated with *in vitro* oxidant hypersensitivity in pathologic and artificially dehydrated cells (SAUBERMAN, FORTIER, JOSHI, PIOTROWSKI & SNYDER), 15.
Spherocytosis, hereditary, erythrocyte membrane skeleton abnormalities in (BURKE & SHOTTON), 173.
Stromal cells, bone marrow fibroblastoid, transplantation in mice via the intravenous route (PIERSMA, PLOEMACHER & BROCKBANK), 285.
Subendothelium, role of von Willebrand factor in platelet adhesion to (MEYER & BAUMGARTNER), 1.

T-cell functional abnormality in B-chronic lymphocytic leukaemia: evidence of a defect of the T-helper subset (LAURIA, FOA, MANTOVANI, FIERRO, CATOVSKY & TURA), 277.
T cell leukaemias and in normal thymic post-thymic T cells, comparison of purine degradative enzymes and terminal deoxynucleotidyl transferase in (MA, MASSAIA, SYLWESTROWICZ, PRICE & HOFFBRAND), 451.
Thalassaemia, abnormal haemoglobin and G-6-PD deficiency in Libya (JAIN), 154.
Thalassaemia, β, and the triplicated α gene locus (KANAVAKIS, METAXOTOU-MAVROMATI, KATTAMIS, WAINSCOAT & WOOD), 201.
Thalassaemia, β, antenatal diagnosis of (WARD, FAIRWEATHER & MODELL), 660.
Thalassaemia, β^+, Portuguese type: clinical, haematological and molecular studies of a newly defined form of β thalassaemia (TAMAGNINI, LOPES, CASTANHEIRA, WAINSCOAT & WOOD), 189.
Thrombocytopenia, heparin-induced, with associated disseminated intravascular coagulation (ZALCBERG, MCGRATH, DAUER & WILEY), 655.
Thrombocytopenic states, platelet-associated complement C3 in (KAYSER, MUELLER-ECKHARDT, BHAKDI & EBERT), 353.
Transferrin receptor and transferrin on marrow cell surfaces, ultrastructural localization of (PARMLEY, HAJDU & DENYS), 633.

Von Willebrand factor, role in platelet adhesion to the subendothelium (MEYER & BAUMGARTNER), 1.
Von Willebrand's disease, acquired: demonstration of a circulating inhibitor to the factor VIII complex in four cases (SAMPSON, GREAVES, MALIA & PRESTON), 233.
